

DEADLINE[®] CONTACT DUST

**Rodenticide for professional use against rats and mice.
For use indoors and outdoors.**

**HARMFUL
IF SWALLOWED**

HARMFUL

Contains 0.15% w/w bromadiolone

CONTENTS: 3kg e

DIRECTIONS FOR USE:

Deadline Contact Dust is a ready-to-use contact dust which should be used in conjunction with a standard bait product for maximum control. Bait labels must be affixed to any decanting bucket or vessel into which the contact dust is transferred prior to its placement.

Use approximately 100g dust per location. Using a spoon or dust gun apply to dry, concealed and secure rat and mouse runs and harbourages. Wipe away all exposed and spilled dust. Ensure air movement will not disperse the dust. This product can be used in dry rat burrows.

Always position baits well so as to protect from the prevailing weather and to prevent access by humans, domestic animals and wildlife.

Once the rodent population is completely controlled, do not place further rodenticide until a new infestation is identified.

The resistance status of the target population should be taken into account when considering the choice of rodenticide to be used.

Deadline[®] is a registered trademark of Rentokil Initial UK plc.

STATUTORY CONDITIONS RELATING TO USE

FOR USE ONLY IN RODENT CONTROL BY PROFESSIONAL OPERATORS

Application Rate: APPLY AS NECESSARY.

The (COSHH) Control of Substances Hazardous to Health Regulations 2002 may apply to the use of this product at work.

Engineering control of operator exposure must be used where reasonably practicable in addition to the following items of personal protective equipment.

Wear suitable gloves. Wear suitable dust mask.

However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.

AVOID ALL CONTACT BY MOUTH.

DO NOT PLACE DUST where food, feed or water could become contaminated.

PREVENT ACCESS TO DUST by children, birds and non-target animals, particularly dogs, cats, pigs and poultry.

Search for and remove rodent bodies at frequent* intervals during treatment (unless used in sewers). Collect and dispose of the remains of bait and any remaining rodent bodies after treatment (unless used in sewers).

You must ensure that you comply with legislation regarding the correct disposal of waste. For further guidance, contact the Environment Agency or your local Scottish Environment Protection Agency (SEPA) office. (*Intervals will vary depending on formulation and treatment regime; therefore the user should refer to and comply with the manufacturer's guidelines).

This material and its container must be disposed of as hazardous waste.

HARMFUL TO WILDLIFE.

READ ALL PRECAUTIONS BEFORE USE.

HSE 6722

PRECAUTIONS

To avoid risks to man and the environment, comply with the instructions for use.

In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

WASH HANDS AND EXPOSED SKIN before meals and after use.

Keep container tightly closed.

Keep only in the original container.

KEEP IN A SAFE PLACE.

Wild mammals and birds may be at greater risk if this product is not used in accordance with the label.

ADVICE TO DOCTOR

Bromadiolone is an indirect anticoagulant. Phytomenadione, Vitamin K1, is antidotal. Determine prothrombin times not less than 18 hours after consumption. If elevated, administer Vitamin K1 until prothrombin time normalises. Continue determination of prothrombin time for two weeks after withdrawal of antidote and resume treatment if elevation occurs in that time.

**THIS PRODUCT IS APPROVED UNDER THE U.K. CONTROL OF PESTICIDES
REGULATIONS 1986 (AS AMMENDED) FOR USE AS DIRECTED.**

STORE IN A COOL DRY PLACE AND PROTECT FROM FROST.

Bitrex is added to prevent swallowing by humans.
